CONCLUSIÓN

Introducción

EL OVINO Y CAPRINO DE LECHE EN LA AGRICULTURA ESPAÑOLA 2023

1. Dimensión económica.

En 2023, el sector ovino y caprino supuso en torno al 9% del valor de la PFG, incluyendo en conjunto la producción de carne y leche. Se situó según esta importancia económica, por detrás del sector porcino, el bovino de leche y de carne y el sector aviar de carne y huevos.

La producción de leche de ovino en 2023, se estima en torno a un valor económico de 736 millones de €, es decir el 2,6% de la Producción de la Rama Ganadera en España. La producción de leche de cabra, por su parte, supuso el 1,7% de la PFG con un valor de 485 millones de €.

Dentro de la producción final del sector ovino y caprino, la leche de oveja supone un 31 % del valor y la leche de cabra un 20%, frente al 49% que supone el subsector de carne. Sobre el sector lácteo representan el ovino y caprino de leche respectivamente un 14% y 9%, mientras que el 77% restante correspondería al bovino de leche.

2. Producción.

La producción de leche (INFOLAC: declaraciones de entregas+venta directa) ascendió a 502,59 millones de litros de leche de oveja (-3,5% vs 2022) y 452,59 millones de litros de leche de cabra (-2,9% vs 2022). En leche de oveja, Castilla y León produce el 55% del total nacional, seguida por Castilla-La Mancha con el 34%. En leche de cabra, Andalucía es la que más produce (un 46% del total), seguida por Castilla-La Mancha (16%).

3. Censos.

- **Ganado ovino:** el censo se situó en 13.596.561 cabezas, de las cuales 10.435.756 eran hembras (incluida la reposición). De estas hembras, 7.175.172 eran de aptitud cárnica (un -4,5% menos que en 2022) y 1.861.966 ovejas de ordeño (-7,3% que 2022). Las de ordeño, representan en 2023 el 20,6% de total de hembras de ganado ovino (-2,3% respecto a 2022). Por CCAA, las hembras reproductoras de orientación "láctea" de España se concentran principalmente en Castilla-La Mancha con el 42,1% y Castilla y León con el 39,0%.

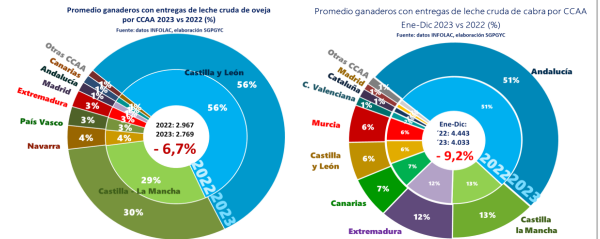

- **Ganado caprino:** el censo se situaba en 2.293.470 cabezas (-6,9% respecto a 2022), de las cuales 1.805.878 eran hembras (-7,3% respecto a 2022). De estas hembras, 1.102.222 eran de ordeño (-8,7% respecto a las hembras de ordeño de 2022). A diferencia de lo que ocurre en el ganado ovino, existe un mayor número de hembras que se orientan a la producción de leche y representan el 74,0% del total de hembras de ganado caprino en España (-1,4% respecto a 2022). Por CCAA, el censo de hembras de ordeño se concentra en Andalucía (38,7%), Castilla-La Mancha (14,6%), Extremadura (11,1%), y Canarias (11,0%).

Introducción

EL OVINO Y CAPRINO DE LECHE EN LA AGRICULTURA ESPAÑOLA 2023

4. Número de ganaderos con entregas de leche cruda.

El número promedio de ganaderos con entregas de leche cruda de oveja en 2023 descendió un 6,7% con respecto a año 2022, situándose en 2.769. El nº promedio de ganaderos con entregas de leche cruda de cabra se situó en 4.033 y, con respecto a 2022 se produjo un descenso del 9,2%

5. Precios y costes de producción.

En 2023 los precios tanto de la leche de oveja como de cabra empezaron el año registrando un precio que quedó por encima de lo registrado para el año anterior y alcanzaron máximos históricos.

La campaña de la leche de oveja, siguiendo el patrón estacional para esta producción, acentuó la tendencia al incremento a partir de mayo e incrementó la diferencia del precio con respecto a años anteriores no obstante en el último mes el año se produjo un cambio de tendencia hacia el descenso.

En el caso de la leche de cabra, la evolución de los precios siguió un patrón estacional similar al de años anteriores, manteniendo la diferencia con respecto a las cotizaciones del año anterior en la primera parte del año, disminuyendo esa diferencia con años anteriores en la segunda mitad del año para terminar el año con el cambio de tendencia al descenso.

| COMPARATIVA PRECIO MEDIO 2023 vs 2022 | 2022 | 2023 | % DIF. 23/22 |
|---------------------------------------|------|-------|--------------|
| Leche de oveja INFOLAC (€/Hgdo) | 9,79 | 13,03 | +33% |
| Leche de cabra INFOLAC (€/Hgdo) | 9,94 | 12,28 | +24% |

Por otro lado, con respecto a los costes de producción, el precio medio de la ración completa de ovino lechero en 2023 fue de 285,21€/i (-2% superior al precio medio de 2022) y la ración completa para caprino lechero de 309,01€/t (-5% superior al precio medio de 2022).

Introducción

EL OVINO Y CAPRINO DE LECHE EN LA AGRICULTURA ESPAÑOLA 2023

6. Comercio exterior.

Nota: No se dispone de un código aduanero específico que permita identificar los intercambios de productos lácteos por especie de la que provienen. Todos ellos están incluidos dentro del código genérico de “leche y productos lácteos”. En el caso de los quesos de oveja y cabra la mayor parte quedarían incluidos en la partida “los demás”.

En 2023, el comercio exterior de queso, cuya balanza es tradicionalmente negativa, registra una balanza comercial de -955 Millones de euros (aumenta el déficit comercial un 2% respecto al año 2022). Las exportaciones de “todos los quesos” alcanzaron los 807 millones de euros (+14% respecto a 2022) y las 117.815 toneladas (+1 % respecto a 2022). En términos de valor económico, el principal destino es Francia con el 21% de lo exportado por España (172 millones de € en 2023), y en volumen, la mayor parte de los envíos tienen destino en la UE (75% de lo exportado en 2023). En el caso de las exportaciones extracomunitarias, el principal destino es EEUU con 30% del total, el mayor *volumen* exportado se incluye dentro de la sub-partida “los demás quesos” mientras que en las exportaciones al mercado UE destacan el queso fresco, rallado en polvo, fundido y de pasta azul.

7. Conclusiones.

En 2023 el número de explotaciones de orientación láctea con respecto a 2022 disminuyeron un 7% en el sector ovino y un 4% en el caprino. La tendencia al escenso en el número de explotaciones continúa en 2024. Se encuentran registradas en la base de datos SITRAN (2024), 5.216 y 5.339 explotaciones lácteas de ovino y caprino respectivamente que representan el 5% y 7% del total de explotaciones de ganado ovino y caprino.

El número promedio de ganaderos con entregas de leche de ovino y caprino en 2023 estuvo en 2.769 y 4.033 respectivamente y, comparado con el nº promedio del año 2022, se produce un descenso del 6,7% y 9,2%.

En cuanto a los costes de producción, ambos sectores conviven con incertidumbres derivadas de la disponibilidad de recursos pastables que a su vez están relacionados con la climatología, y, la volatilidad de precios de las materias primas para alimentación animal en un entorno global.

Una tendencia al descenso en los precios de las materias primas de alimentación animal, junto con un descenso en el sacrificio de cabezas de ganado no ha frenado en cambio, la disminución de la producción de leche de oveja (-3,5%) y de cabra (-2,9%).

Los precios tanto de la leche de oveja como de cabra, comenzaron la campaña anual registrando cotizaciones que quedaron por encima de lo registrado para el año 2023, y alcanzaron cifras históricas no obstante al final del año se produjo un cambio de tendencia hacia la disminución de los precios.

Finalmente, la evolución del consumo de queso puro de oveja y de cabra en los hogares en 2023 muestra con respecto a 2022 una tendencia al descenso en un -4% y -9% respectivamente.
