

Nº PATENTE	SOLICITANTE	PAÍS	TÍTULO
US7785479	HOSFORD M H	Estados Unidos	Undesired solids separating and removing method for e.g. landscaping industry, involves stopping introduction of compressed air into tank, and purging air in top of tank and resuming flow of liquid stream from aquaculture system.
KR20100086784	GYEONG M K TAE A H	Corea	Dissolved oxygen and room temperature control apparatus for fish farm, has cold and warm water tub supplying cold and hot water for controlling water temperature of specific portion, and air supply part supplying oxygen to specific portion.
INCHE201001645	MANOJV R VASUDEVAN N	India	Method for treatment and recirculation of aquaculture wastewater.
WO2010087713	AKVA GROUP ASA	Noruega	Fish-farming net pen, has buoyancy part provided at upper portion of net wall of net bag, shape-stabilizing part connected to lower portion of net bag, and suspension part transmitting suspension forces to buoyancy part.
TW540575U	JING S LI D LIN Y	Taiwan	An equipment for water purification used in the recirculating aquaculture includes sedimentation pond that can collect solids, a surface flow ecological reaction pond and a subaurface flow ecological reaction pond.
FR2941238		Francia	Use of a transparent composition made of methacrylic polymer for the of installations for the culture of photosensitive organisms comprising microorganisms, microalgae, photosynthetic bacteria and plankton.
ES1072223U	PINEIRO AGUIN A M	España	Mussel farming tray, has two side guides arranged parallel to each other, rope fixed between two pulleys that are mounted on platform that is mounted on machine, and multiple rails arranged on set of strings.
JP2010172238	GH KANSAI BUNRI SOGO GAKUEN KANSAI AUTOME KIKI KK SHIGA-KEN	Japón	Exterminating parasites, preferably external parasites, by supplying water into fish tank by making ozone gas into microbubble, allowing fish to swim, contacting bubble with gills and body surface of fish and exterminating parasites.
CN201491600U	FRESH WATER FISHERIES RES CENT CHINESE	China	Device for sucking e.g. tiny substances in water, has air conduit connected with decompressor and collecting bottle, and power lever sleeved on pin shaft of handle, where end of lever is connected with piston rod.
CN101773089	BEIJING FISHERIES RES INST	China	Portable fish egg incubator, has incubation bucket whose bottom is provided with double-layer structure, where inner upper layer of bottom of double-layer bucket is uniformly arranged with small round holes.
CN101766139	UNIV SHANGHAI MARITIME	China	Experimental apparatus for researching fish behavior, has water power supplier, and reef composition that is composed of multiple single reefs arranged in same plane or on same straight line.
CN101743933	ZHANG L	China	Octopus variabilis egg taking device, has star-shaped clapboard and round board, which are fixed by screw, and rectangle hole formed between clapboard and round board and provided as egg taking nest.
