

Nº PATENTE	SOLICITANTE	PAÍS	TÍTULO
JP2008050275	FUJITSU LTD	Japón	Preventing infection caused by pathogen such as virus, bacteria or fungi in fishery product or human body, involves using photocatalyst material containing photocatalyst having adsorptivity
KR100765357B	BINEX CO LTD UNIV PUKYONG NAT	República de Corea	Ghost vibrio anguillarum high surface antigen vaccine contain prevent vibriosis culture fish side effect
BRPI0504684	LAB AVI-MEX LTDA	Brasil	Chloramphenicol antibiotic based food supplement shrimp consist oral medicine inhibit ribosome unit protein synthesis
WO2008059225	BIOTEC PHARMACON ASA GARDNER REBECCA	Noruega	Use of Asteraceae protein for treating ectoparasitic infection or infestation
CN101095467	XUNMENG ZHU	China	Production of fish feed involves adding water, maltogenic amylase, composite enzyme, active leaven, sodium chloride and lactic acid in fermentation tank containing crop straw powder, inoculating bacteria, and culturing
CN101099543	QINENG WU	China	Feed aquatic organism comprise beneficial microorganism bacillus
WO2007128348	INVE TECHNOLOGIES	Bélgica	Bacteria infect treat composition organism aquaculture mollusc fish contain phage lysate fraction comprise inactivate form
KR100735038B	JUNG S J LEE J H	República de Corea	Recombination protein vaccine composition method prevent treat cause environment pollution
WO2008009773	CONSEJO SUPERIOR INVESTIGACIONES CIENTIFICAS	España	Device determine necessary food ingestion fish species culture transparent tube light source diffusion screen photodetector video camera interface connect computer software
KR100735038B	JUNG SUNG JU	República de Corea	Recombinant protein vaccine against miamiensis avidus, and composition and method for preventing and treating scuticociliatosis caused by miamiensis avidus in flatfish without environmental pollution by using the same
