

N° PATENTE	SOLICITANTE	PAÍS	TÍTULO
WO9921977	LIFETECHNOLOGIES INC	Estados Unidos	New nucleic acid clone method
CN101086014	UNIV ZHONGSHAN	China	New control region mitochondria DNA fish comprise pair degenerate prime useful species identify geographical assess resource
CN101067155	UNIV NINGBO	China	New multiple react reagent kit comprise DNA prime useful marine vibrio species
TW290585B	CHEN JAU-DER HUANG CHIA-FU	Taiwan	RAPD markers
CN101084780	SHANGHAI CHUANGBO ECOLOGICAL ENG CO LTD	China	New microbe feed additive useful promote goose liver growth enhance disease resistance immunological competent animal aquatic
WO2008027235	UNIV NEW MEXICO STATE UNIV SCI & TECHNOLOGY CORP NEW MEXICO	México	Prevent ameliorate treat disease comprise feed aquatic animal genetic modified micro algae express recombination molecular specific target key pathogen
CN101077063	CHINESE ACAD SCI OCEANOGRAPHY RES INST	China	Monomer oyster scale culture method produce require based parent donor filter larva realise metamorphosis process
