

Nº PATENTE	SOLICITANTE	PAÍS	TÍTULO
FR2919983	LEBRUN G	Francia	Oyster i.e. full sib type hybrid oyster; obtaining method, involves hybridizing ostrea edulis oyster of Mediterranean resistant to pathogens and non-resistant oyster of opposite sex by developing oysters in container in dark photo period
WO2009003671	DELBRUECK CENT MOLEKULARE MEDIZIN MAX	Alemania	New polypeptide selected from variants of SB10 transposase for gene tagging, gene discovery, and in vitro mobilization of a gene comprises amino acid sequence differing from the sequence of SB10 transposase
ES2308896	FUNDACION AZTI AZTI FUNDAZIOA	España	Method for detecting parasite in muscle tissue of fish, involves amplifying gene fragment by primers and probe of specific sequence
KR100820292B	UNIV CHEJU NAT IND ACADEMIC COOP FOUN	República de Corea	Novel expression vector comprises promoter of actin gene of disk abalone, useful as vector which specifically expresses disk abalone and useful genes of various invertebrates
