

Nº PATENTE	SOLICITANTE	PAÍS	TÍTULO
CN101638627	HUI F	China	New strain of <i>Bacillus subtilis</i> HF-A2 under preserving number CGMCC No.3241, useful for preparing biological feed additives and for inhibiting spoilage organisms of alimentary tract, and replacing antibiotics and chemical medicine
CN101627793	ZHENGZHOU XINWEI NUTRITION TECHNOLOGY CO LTD	China	Industrial manufacture of wheat feed protein hydrolysate by mixing wheat sourdough albumen powder with warm water; adding basic protease, regulating pH, adding complex enzyme preparation, hydrating, and enzymatic inactivating
CN101637141	SHANDONG MARINE & FISHERIES RES INST	China	<i>Octopus ocellatus</i> breeding method for artificial pond, involves providing square clam, variengated clam and shells and small crabs of living body according to culturing density and food intake intensity of <i>Octopus</i>
CN101627801	UNIV GUANGDONG OCEAN	China	Immunity intensifier e.g. used for young tilapia fingerling, comprises beta-glucan, ginsenoside, seaweed polysaccharide, phospholipids, vitamin C-2-polyphosphonate, vitamin E, digestive enzyme and citric acid
WO2010028215	MIONIX CORP	Estados Unidos	Modified feed composition for suppressing and controlling bacterial infection of fish or shrimp contains fish or shrimp feed material, acidulant, and clay material
WO2010014228	MILLS P	Estados Unidos	Fish feeding stimulant comprises host media for releasing dominant amino acid with predetermined flux rate into aqueous environment, which exceeds threshold level for involuntary feeding response of fishes in area surrounding media
CN101653204	JIANGSU HAICHEN SCI & TECHNOLOGY GROUP C	China	Compound feed for improving nutrition and disease resistance of bream, comprises soybean meal, fish meal, rapeseed extract, cotton seed, wheat, rice bran, vitamin and mineral, oil, and zeolite powder
CN101627800	UNIV GUANGDONG OCEAN	China	Feed additive for improving fertility of tilapia broodstock, contains fish meal, clamworm powder, isolated soy protein, fish oil, vitamin C-2-polyphosphonate, vitamin E, zinc amino acid chelate and manganese amino acid chelate
CN101589768	ZHANG Z	China	Compound feed for fish, contains rice bran, green bran, plant meal, soybean meal, cottonseed meal, fish meal, calcium monohydrogen phosphate, bentonite, salt, choline, wheat middling and wheat embryo
WO2010022702	EMSLAND-STAERKE GMBH	Alemania	Extracting fat containing leguminous protein comprises extracting the protein from milled leguminous raw material with water, isolating protein by heat coagulation, separating protein and drying coagulate
